PROFILE

I've always been curious about fixing problems, a technophile who is fixated on the newest gadgets. Though it was always more of a hobby than a professional emphasis. I began learning to code when I first began my studies at university. After a few months, I came to the conclusion that programming was the correct career choice for me. JavaScript, HTML, CSS (as well as frameworks) are just programming languages I'm familiar with, but I'm continually learning new things, so that is it.

EDUCATION

Azerbaijan State Oil and Industry University

Bachelor of System Engineering

- In partnership with Georgia State University of the USA/Robinson Business School.
